

Northumberland Visions and Values

Foster Care

Our Vision...

...That Northumberland's children and young people live as part of secure families where they can grow up as healthy, safe, confident citizens who contribute positively to the lives of those around them.

Our Values...

...are the foundation of our services to children and families; they run through everything we do and how we treat people:

- Promoting the safety and welfare of children and young people is paramount
- Young people should be listened to and actively encouraged to participate in decisions about their lives and the services that support them
- To be fair and respectful of others; value diversity and promote equality
- That all young people have the opportunity to thrive and enjoy family life

Our Purpose...

...We will ensure sufficiency and stability of suitable placements with families to improve outcomes for children and young people.
